Raimy Lamarr

AI Engineer • Autonomous Agents • Cloud Infrastructure

Raimylamarr@gmail.com +1 (205) 217-7033 github.com/raimylarmarr raimylamarr.dev

ABOUT

AI Engineer with deep expertise in building autonomous agent systems, cloud-native infrastructure, and intelligent automation pipelines. Passionate about open-source collaboration, scalable AI architectures, and pushing the boundaries of what autonomous systems can achieve. Experienced in designing multi-agent frameworks, CI/CD orchestration with Harness, and deploying production-grade AI solutions on AWS and Azure.

EXPERIENCE

Senior AI Engineer

Jan 2025 – Present

NeuralForge AI — San Francisco, CA (Remote)

- Architected and deployed a multi-agent orchestration platform handling 2M+ daily autonomous task executions across distributed cloud infrastructure
- Built custom AI agent pipelines using LangGraph and CrewAI, reducing manual workflow overhead by 73%
- Designed Harness CI/CD pipelines for continuous model deployment, achieving 99.7% deployment success rate
- Led migration of inference workloads to AWS SageMaker, cutting latency by 40% and costs by 55%

AI Platform Engineer

Jun 2024 – Dec 2024

Synth Labs — Austin, TX (Hybrid)

- Developed autonomous coding agents capable of generating, testing, and deploying microservices with minimal human intervention
- Implemented RAG-based knowledge retrieval systems using Python, FAISS, and OpenAI embeddings for enterprise clients
- Automated cloud infrastructure provisioning using Terraform and Python scripts across AWS and Azure environments
- Contributed to internal agent framework that was later open-sourced (1.2k+ GitHub stars in first month)

Cloud & Automation Intern

Jan 2024 – May 2024

Agentic Works — Atlanta, GA

- Built Python automation scripts for cloud resource monitoring, alerting, and auto-scaling on AWS
- Assisted in deploying LLM-powered chatbots on Azure OpenAI Service for customer support workflows
- Created Harness pipeline templates that reduced team onboarding time for CI/CD by 60%

OPEN SOURCE CONTRIBUTIONS

AutoGPT

Contributor — github.com/Significant-Gravitas/AutoGPT

- Contributed plugin architecture improvements for autonomous task execution and memory management
- Optimized agent loop performance, reducing token consumption by 25% per execution cycle

LangGraph (LangChain)

Contributor — github.com/langchain-ai/langgraph

- Implemented custom state graph nodes for multi-agent collaboration patterns
- Added documentation and examples for Harness CI integration with LangGraph workflows

CrewAI

Contributor — github.com/crewAIInc/crewAI

- Developed custom tool integrations for cloud automation agents (AWS SDK, Azure CLI)
- Built reusable crew templates for DevOps and infrastructure management use cases

n8n

Contributor — github.com/n8n-io/n8n

- Added AI-powered workflow nodes for automated data pipeline orchestration
- Contributed Linux server deployment guides and automation scripts for self-hosted instances

SKILLS

AI & AGENTS

LangChain · LangGraph · CrewAI · AutoGPT · RAG Systems · Prompt Engineering · Multi-Agent Orchestration

CLOUD & INFRASTRUCTURE

AWS · Azure · Terraform · Docker · Kubernetes · Linux (Expert) · Serverless

DEVOPS & AUTOMATION

Harness CI/CD · GitHub Actions · Python Automation · Bash Scripting · n8n · Infrastructure as Code

LANGUAGES & TOOLS

Python · JavaScript · Go · SQL · Git · REST APIs · GraphQL

EDUCATION

Bachelor of Science in Computer Science

2022 – 2025

Albany State University — Albany, GA

- Concentration in Artificial Intelligence & Cloud Computing
- Dean's List — Fall 2023, Spring 2024
- Senior Capstone: Autonomous Multi-Agent System for Campus Resource Optimization

CERTIFICATIONS

AWS **AWS Solutions Architect Associate**
Amazon Web Services — 2025

AWS **AWS Machine Learning Specialty**
Amazon Web Services — 2025

AZ **Azure AI Engineer Associate (AI-102)**
Microsoft Azure — 2024

AZ **Azure Administrator Associate (AZ-104)**
Microsoft Azure — 2024

H **Harness Certified CI/CD Developer**
Harness.io — 2024

LX **Linux Foundation Certified System Administrator**
The Linux Foundation — 2023
