ABOUT

AI and cloud infrastructure engineer with five years of hands-on Linux, networking and server operations experience. Designs autonomous agent workflows and harnesses, runs production Linux infrastructure across AWS, Azure and Google Cloud, and automates provisioning end to end. Comfortable owning a system from first boot through monitoring, backup and recovery.

EXPERIENCE

Independent AI & Cloud Engineer

2023 – Present

Self-employed — Remote, Nigeria

- Provision and operate Debian/Ubuntu server infrastructure: systemd service supervision, firewall policy, monitoring, backup and recovery across multiple VPS environments
- Deploy and maintain DNS, tunnelling, proxy and VPN services — Xray/VLESS, WireGuard, Hysteria2 — including routing rules and TLS configuration
- Build AI agent workflows and harnesses: tool orchestration, task decomposition, REST API integrations and automated execution pipelines
- Deploy and manage workloads on AWS, Azure and Google Cloud, including Docker containers and Cloud Run services
- Automate provisioning and deployment in Python, Go, Bash and Terraform, including CI/CD pipelines

Freelance Engineer

2020 – Present

Fiverr — Remote

- Delivered server setup, deployment and troubleshooting for international clients on a freelance marketplace
- Handled Linux administration, networking configuration and application deployment to client specifications

IT Support Intern

2022

ICT Lab, Abia State University — Uturu, Nigeria

- Set up workstations and software, and troubleshot network and connectivity faults in the university ICT lab
- Supported staff and students with hardware, account and connectivity issues during industrial training
